

4S1000C-40/800 Submersible Solar Pump Package

4 x 200W PANEL PACKAGE

4 x 200W monocrystalline panels | Pump, motor, and
40m power cable | Control box | 2 x 2m MC4 cables |
10m & 40m sensors | Y-adaptor pair

Top performing 4" solar submersible centrifugal pump with a 1000W motor, boasting a higher flowrate at lower level of head. Suitable for customers wanting better flowrate than our solar helical screw pump range.

- Capable of delivering strong volume from a small bore hole
- Easy D.I.Y. installation
- Lifts up to 70 metres
- 2-year warranty
- Lifetime customer service

Pump Performance

Head (m)	10	20	30	40	50	60	70
L/min	67	63	58	47	25	13	8

SPECIFICATIONS

Type	Centrifugal
Power	1000W / 96V-DC
Diameter	4 inches
Max head	70m
Max flow	4,000 L/hr
Outlet	1.25 inch

FEATURES

Advanced 3-phase brushless stainless steel DC motor
Adjustable pump speed and timer for auto shut off/restart via sensors
High quality Japanese bearings (NSK)
Soft start and Maximum Power Point Tracking (MPPT)
Control of tank and bore water levels via sensors
Stainless Steel 304/316 for all exterior and outlet components
Stainless Steel 630 magnetic shaft for exceptional motor durability

ACCESSORIES – Get more out of your pump with these add-ons

Bore caps

Seals the bore hole and provides protection against weather, debris, and damage.

Pressure Switch

Used with a float valve to automatically switch the pump off when tank is full.

Converters

Allows connection to a 240V generator or mains power so you can pump water in all conditions.

Dam Floats

Fit for dams and wells to allow the pump to float and pump water effectively.
